4. Transportation and Storage

- Products shall be stored in a clean and dry environment. No acid, alkali, or other corrosive gases shall be present in the vicinity of the storage area.
- Storage conditions for unopened products: Temperature: -20°C to 25°C; Humidity: ≤ 80%; Storage period: 1 year.
- For silver-plated components, store in a light-proof, sealed package. Prolonged air exposure or contact with sulfides is strictly prohibited. Bare-hand touching is not allowed.
- Products are suitable for transportation by conventional means. During transport, avoid impact, severe vibration, exposure to rain or snow, and water immersion.

5. Precautions

- Do not use the connector beyond its rated current and voltage, or insert/remove it while the circuit is live. Failure to comply may result in accidents or malfunction.
- The connector is intended for circuit connection only and is not a load-bearing component. Do not use the connector as part of a structural assembly.
- Use the connector only under the environmental conditions specified in this datasheet. Do not use it in locations with high temperature or high humidity.
- The connector is a precision component and is susceptible to deformation, bending, or detachment. Handle with care when unpacking.
